

In reference to the National Association of Broadcasters' position on satellite radio offering local traffic and weather. So what? Are they afraid of competition? I have always been under the assumption that competition is what makes American business strong. I am a businessman and acknowledge that fact. Without competition, our system simply doesn't work. Please think this through and I know your decision will be to allow satellite radio to offer these valuable services. XM and Sirius should be offered the same First Amendment rights as anyone else!
